Their high mobility allows light tanks to reveal units on the battlefield and transfer their coordinates to teammates.. Secure victory by destroying all enemies, or the most in the allotted time Climb into a multi-ton behemoth equipped with a powerful cannon and do battle alongside and against tankers from all over the world.. Once you get a spotter up from a battleship your perspective changes and it usually messes up my first couple of salvos as I have to retrain myself ingame to not shoot as I was shooting earlier in the game.. Their extremely powerful cannons are capable of taking out enemy vehicles in one shot from the other side of a battlefield, but theyre incredibly vulnerable in close quarters battle.. The challenge comes from executing tactics on the battlefield, such as coordinating attacks with your teammates, controlling important areas of the map, and prioritizing enemy vehicles to focus fire on. Their firing rates are similar to the firing rates of real tanks in training ground conditions.. Theyre best used as forward observers, revealing enemy positions and relaying that information back to the rest of the team.. Tank destroyers are perfect defensive units with powerful cannons capable of engaging enemy vehicles from long distances.. Roll out You can only platoon with players on the same console, however Players will take control of light, medium, and heavy tanks, as well as tank destroyers and artillery from these eras.. My eyes are not what they use to be, and I find myself looking for sights, Any sugestions.
